- Question & Answer Session
- Survey / Evaluation of our DWI Program
- Receive Embossed Certificate of Attendance

This unique digital awareness program is designed to reduce the number of teens and adults injured or killed as result of alcohol abuse, overdose, and/or alcohol related car crashes. This program has been recognized on both a national and state level as being an outstanding community educational program. **Danger Without Intentions Alcohol & Drug Awareness Program** is a powerful & graphic audiovisual presentation that targets High Schools, Colleges, Universities, Corporations, and Adult or Juvenile Offenders. This program takes the audience on an emergency call providing a vivid look at actual DWI related crash scenes. It provides a sense of being on location with Police, Firefighters, and Paramedics. Listen as you ride along in the back of the ambulance & helicopter. Hear an emotional story from an offender and/or actual survivor of a drunk driving collision that nearly took their life.

The presentation team also provides a one on one question and answer session at the conclusion of the program. The program ends with a poignant and touching segment on the 1st Travis County DWI Murder Charge given to a 19 year old that took the lives of two young students from Manor which will provide a lasting memory.

The Fatal Vision Goggles are used in a Field Sobriety Test so students can see and feel the effects of a person under the influence of drugs or alcohol at .08 or .174.

To date this program has touched the lives of over 337,439 students and adults throughout Texas and the United States. The feedback from over 57,965 surveys received from students, parents, educators, and offenders has been extremely positive. If even one person avoids traffic injury or death because of the information provided, then the small amount of time invested will have been more than worthwhile.
